ABOUT ME

Having completed a Sustainable Product Design BA(Hons), 1st this summer, I am involved in various design initiatives until I begin MA Design Products at RCA in September. I'm an enthusiastic maker who is always looking for new project opportunities within and out of university.

I have always been interested in a sustainable lifestyle, my degree course allowed me to realise the importance of considering sustainable theories and practices when designing products. This is an area I have great passion and knowledge for and will continue to develop as a designer.

My broad range of experiences in everything from freelance design, electrical installation to running educational workshops has taught me some key skills which has both benefited my design work and proves my strong work ethic.

EDUCATION

FALMOUTH UNI
2015-2018

Sustainable Product Design BA(Hons) has developed my existing skills further and introduced those directly related to design and manufacture. I now consider research methods such as HCD (Human Centred Design), I am competent in 2D and 3D visualisation software, as well as establishing a clear understanding of sustainable design theory and practice.

THE BLUE SCHOOL
2012-2014

Studied A levels in Physics, Maths and Design Technology

THE BLUE SCHOOL
2007-2012

Completed 9 GCSE's grades C-A*

EXPERIENCE

HAUSER AND WIRTH
2014-PRESENT

Workshop facilitator – education programme.
Invigilating at Hauser and Wirth.
Blackboard stands designed & constructed for Roth Bar & Grill.
And technician support for events

LIGHTING AND RIGGING
GOFER LIMITED
2016-PRESENT

I have been employed on a freelance bases over the summer for companies such as, Gofer and Aggreko for the setup and technical support for a range of festivals, including, Glastonbury, Cornbury and Waitrose food festival. I'm part of a small team who rig and mange the generators, electrics and lighting on site full time for upto a month.

FREELANCE
KELLY'S OF CORNWALL
2016 SUMMER

A collaborative project that involved designing and making a marketing prop for kelly's of Cornwall. An 'ice cream deflector' was created to fend off seagulls; it was built to a budget, time scale and was designed to be assembled on site.

LAB ASISSTANT
HYDRO INTERNATIONAL
LTD
2014-2015
& 2016 SUMMER

Hydro International are a waste water and flood defence company that specialise in engineering flow control systems. I worked for one year at hydro under a research placement, during this time I worked in their R&D department on the development of a range of their products. This involved designing and making prototypes for testing, contacting manufactures to produce one off test units, as well as evaluating and presenting the results.

LIFEGUARD
AVALON SWIMMING POOL
2011-2014

I trained for a NPLQ (National pool lifeguard qualification), a qualification that I renewed and held for four years while working at a local swimming pool. The role involved me performing routine maintenance tasks, as well as using my training to quickly respond to emergency incidences in and out of the pool.
